SNAPSERVE AI

AI voice agents for Indian business — live in minutes, not months.

Seed raise · Rs 5 Crore · Confidential

Karthikeyan, CEO · karthikeyan@theaitel.com · Chennai

Voice AI for Indian businesses is stuck.

Between DIY stacks, Western APIs, and BPOs —

nobody ships production agents that speak India,

run campaigns, and remember every caller.

We're the founders building that layer.

Problem

Indian SMBs & BPOs can't deploy voice agents without a 3-6 month eng project.

DIY stack

STT + LLM + TTS +

telephony by hand

Western tools

Weak on Indian

languages & telephony

BPO-only

Human cost scales;

no memory or campaigns

No ops layer

No wallet, dispositions,

Meet agent or white-label

Solution

The voice agent platform for India — agents, campaigns, memory, meetings & WhatsApp.

Agent builder

Sarvam + global stack

Live in <10 minutes

Campaigns

Batches, retries,

dispositions, intel

Caller memory

Every caller

remembered

Meet + WhatsApp

Meet/Zoom agents

+ WhatsApp calling

Wallet + partners

Rs 5/min billing

White-label partners

Why now

Indic AI is ready

Sarvam-class models make Tamil, Hindi, Telugu production-grade.

Telephony is programmable

Vobiz / Plivo APIs + WhatsApp calling unlock distribution.

Cost collapse

Voice minutes are cheap enough for SMB outbound + support.

Buyer urgency

Missed leads & clinic no-shows bleed cash every day.

Product surface

One platform — phone, webcall, meetings, WhatsApp, partners.

- Voice agents: barge-in, KB, tools, transfers
- Outbound campaigns + batch analytics
- Inbound routing, DNC, callbacks, bookings
- Google Meet / Zoom meeting agents
- WhatsApp (Vobiz supply + calling) from wallet
- Partner white-label domains + client login

Market — win India enterprise voice first

Beachhead: clinics, D2C, BFSI collections, real estate, staffing, BPO white-label.

Rs 12,500 Cr+

India contact-center & voice ops (directional)

60M+

Indian SMBs with no voice AI stack

Rs 5 / min

Our wedge price — scales with success

Traction — live product, real usage (Aug 2026)

Source: SnapServe Admin — Platform Overview + Finance (15 Jul - 14 Aug 2026)

417 Total users	**4,356** Total calls	**3,982** Total minutes	**205** Calls / 24h
Rs 35,083 Recognized (30d)	**Rs 31,100** Cash-in topups	**4,138** Calls in period	**54%** Completion rate*

*Completed / total in period. Early-stage volume — raise funds growth, not maintenance.

Unit economics (INR)

Rs 5.00	Rs 1.87	Rs 3.13	62.6%
Price / minute	Variable cost / min	Contribution / min	Contribution margin

Fixed burn today ~ Rs 3.0 L / month

- Rs 1.0 L Vobiz / telephony capacity
- Rs 2.0 L Rent, salaries & ops

Break-even ~ 96,000 minutes / month (~Rs 4.8 L) at current margin

Today's volume is far below break-even — this raise buys the go-to-market.

Business model

Usage-first. Customers top up wallets. We earn on every minute.

Wallet usage

Rs 5 / minute

platform fee

Phone numbers

Purchase / rental

via wallet

WhatsApp

Message + call

minutes from wallet

Partners

White-label

sub-accounts

Competition — what wins India?

	Western APIs	DIY / BPO	SnapServe
Indic languages	Weak	Custom	**Native**
Campaigns + CRM	DIY	Partial	**Built-in**
Caller memory	Rare	Rare	**Core**
Meet + WhatsApp	No	Fragmented	**Yes**
INR wallet billing	USD cards	Manual	**Native**
Time to live agent	Weeks	Months	**Minutes**

Why we win

1. India-first stack

Sarvam + local telephony + vernacular UX — not a US product with a toggle.

2. Ops, not just API

Campaigns, dispositions, analytics, wallet, partners — the work after the call.

3. Relationship memory

Agents pick up where the last call ended. Sticky by design.

4. Distribution wedges

Meet agents + WhatsApp calling + partner white-label.

Go-to-market

1. Product-led

Free credit -> first agent -> wallet top-up

2. Vertical sales

Clinics, D2C, BFSI, real estate, staffing

3. Partners

White-label agencies & BPOs resell SnapServe

4. Founder-led

Meet demos with AI agent + live POC

Chennai

3-year projection (base case, INR)

Assumes Rs 5/min, Rs 1.87 variable, funded GTM after Rs 5 Cr raise. Forward-looking.

	Today	Year 1	Year 2	Year 3
Monthly minutes	~few K	**10 L**	**50 L**	**2 Cr**
Monthly revenue	~Rs 35K	**Rs 50 L**	**Rs 2.5 Cr**	**Rs 10 Cr**
ARR run-rate	-	**Rs 6 Cr**	**Rs 30 Cr**	**Rs 120 Cr**
Paying accounts	Early	**250**	**1,200**	**4,000**
Team size	Founders+	**12**	**35**	**80**
Var. gross margin	62.6%	**~63%**	**~65%**	**~68%**

Y1 exit: 10 L mins/mo x Rs 5 = Rs 50 L MRR; Rs 6 Cr ARR run-rate.

Annual P&L projection (base case, Rs Cr)

Uses average monthly volume, not exit run-rate. Forward-looking and unaudited.

	Year 1	Year 2	Year 3
Avg. monthly minutes	3 L	25 L	1.10 Cr
Revenue	Rs 1.80	Rs 15.00	Rs 66.00
Variable cost	(Rs 0.67)	(Rs 5.25)	(Rs 21.12)
Gross contribution	**Rs 1.13**	**Rs 9.75**	**Rs 44.88**
Operating expenses	(Rs 2.40)	(Rs 8.00)	(Rs 24.00)
EBITDA	**(Rs 1.27)**	**Rs 1.75**	**Rs 20.88**
EBITDA margin	(70.7%)	11.7%	31.6%

Expected fully loaded monthly operating break-even around the transition into Year 2.

The ask

Raising Rs 5 Crore seed · 18-month runway · India + global angels / seed funds

40%	**Engineering**	Agents, reliability, Meet, WhatsApp, analytics
30%	**Sales & CS**	Vertical AEs, onboarding, partner success
15%	**Infra**	Vobiz capacity, cloud, observability
10%	**Marketing**	Content, demos, events, brand
5%	**Legal & ops**	Entity, contracts, compliance

One seed round - four committed CCPS drawdowns

Rs 20 Cr pre-money - Rs 25 Cr post-money - 20% seed dilution

A	Rs 15 L	At signing	Immediate infra, compliance and delivery
B	Rs 85 L	Foundation	Reliability plan + initial paying pipeline
C	Rs 1.50 Cr	Early scale	Target: 100 paying; ~2 L mins/mo
D	Rs 2.50 Cr	Growth	Target: 250 paying; path to 10 L mins/mo

One financing, not four valuations. Indicative and non-binding; final terms subject to definitive documents.

18-month milestones

0-6 mo

100 paying; ~2 L monthly minutes; flagship vertical cases

6-12 mo

10 L mins / Rs 50 L MRR exit target; partner channel live

12-18 mo

Repeatable GTM; positive monthly contribution; Series A ready

India will talk to AI.

SnapServe makes sure those calls convert.
