snapserve.ai

App Launch Checklist

Generated June 26, 2026

1 · Legal & Compliance

- [ ] Register legal entity (Pvt Ltd / LLP) if not done
- [ ] Fill in Terms of Service blanks (entity name, address, city, DPO name)
- [ ] Fill in Privacy Policy blanks (entity name, hosting region, DPO name)
- [ ] Publish ToS and Privacy Policy as live pages on snapserve.ai
- [ ] Add ToS / Privacy Policy links to sign-up page and footer
- [ ] Add "I agree to Terms of Service" checkbox on registration
- [ ] TRAI DLT registration — required for commercial outbound calls in India
- [ ] Register telephony numbers as transactional/promotional on DLT
- [ ] Add AI disclosure to agent greeting template
  -> e.g. This is an AI assistant. This call may be recorded.
- [ ] Publish DPDP grievance officer name and contact on site

2 · Security

- [ ] Rotate ALL secrets before launch — dev secrets must never reach production
  -> SESSION_SECRET, RAZORPAY keys, GROQ key, ADMIN_TOKEN
- [ ] Confirm ADMIN_TOKEN is strong (32+ random chars) and not shared
- [ ] Verify provider API keys are encrypted at rest in production DB
- [ ] Restrict /api/admin routes by IP allowlist or VPN in production
- [ ] Set rate limiting on auth endpoints (Google OAuth callback, sign-in)
- [ ] Review CORS settings — only snapserve.ai domains whitelisted
- [ ] Confirm HTTPS everywhere — verify on custom domain after DN
- [ ] Scan git history for accidental secrets before making repo pub

3 · Payments & Billing

- [ ] Switch Razorpay from test mode to live mode
- [ ] Test real payment flow: add credits -> call fires -> wall
- [ ] Set up Razorpay webhook for payment confirmatio
- [ ] Set wallet minimum balance / low-balance ema
